get rich but to enrich others."

- Robert John Meehan

Lesson Plan for the week of April 20th

All subject areas will be conducted online using the IXL website this week. It is very important students complete the recommended skills that have been assigned to them.

How to find the recommended skills:

1. Log in to IXL either on your computer, ipad, or smartphone.
2. On the left of your screen, find **LEARNING** and click the word **RECOMMENDATIONS** underneath.
3. To the right of your screen is the **GOLD STAR** and the words **SKILLS RECOMMENDED**. Click there and scroll down to find those skills and make your choice.
4. If you get stumped on something, look for the **learn with example** above the problem or question you are working on. It will show you how to do the math or give you a definition or example.

**** I have only added skills for this week. If you have not finished the math assignments from last week, you will need to finish those as well. ****

****I will be checking those AWESOME smart scores everyday****

****The IXL assignments will also be considered for your report card****
